EDUCATION

BSc (Hons) Computer Science, Birmingham City University

2024 - 2027

- Current second-year student; expected completion May 2027.
- Selected modules and subject areas include software design, backend web services, databases, computer mathematics and networking.

PROJECTS

BMW Asset-Tracking MVP

2025 - present

- Built a CCTV-style asset-tracking proof of concept using Python, OpenCV, AprilTags and webcam input
- Simulated factory-style vehicle identification and tracking with tagged toy vehicles in a controlled environment
- Improved reliability through iterative debugging, testing and Git-based development

Procell Website Project

2025

- Designed and developed website structure and content for Procell with a focus on clarity, usability and professional presentation

FlexShade Smart Curtain System, BCU Innovation Project

2024 - 2025

- Contributed to a smart climate-responsive curtain system combining sensors, automation and app control
- Built app components in Unity and C# from Figma wireframes and supported MVP planning and presentation work

Hospital Management System

2024

- Created a Python-based academic project for managing patient and hospital records
- Structured core features around usability, data handling and clear program flow

EXPERIENCE

Innovation Fest, Project Presenter

2025

- Presented the FlexShade project as part of a student team, explaining the concept, MVP and development approach
- Contributed to preparing presentation materials and communicating technical ideas clearly

Apple Online, Game Developer

2021 - 2022

- Worked on app and game development tasks that strengthened software engineering, debugging and practical problem-solving skills
- Gained experience across the development lifecycle in a collaborative technical environment

AFA (Al-Faisal Football Club), Event Planner

2019 - 2020

- Volunteered in event planning and coordination, developing communication, organisation and teamwork skills

TECHNICAL SKILLS

Programming: Python, Java, C++, C#, SQL

Tools: Git, GitHub, Docker, VS Code, OpenCV, Unity and Figma
